

## DYNALOG

The software for planning cabinets and ordering fittings

### Cabinet planning plus additional features

Easy cabinet planning and uncomplicated ordering of the required fittings makes your job easier and leaves you more time to take care of your customers.

DYNALOG, our planning and ordering software, can do even more: With the newly added CABMAX (Cabinet Manager), you can easily plan kitchens according to DYNAMIC SPACE criteria. Showing your skill and competence and giving you satisfied customers.

#### DYNALOG eliminates trial applications

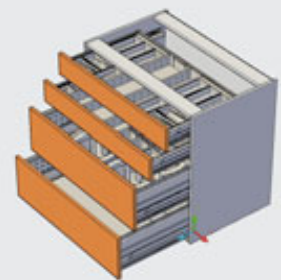

The automatic collision check in DYNALOG for all planning results ensures that everything will work together. This helps to eliminate expensive trial applications.

#### The three main DYNALOG functions:

##### DYNAPLAN (cabinet planning)

With DYNAPLAN, you have several options for planning cabinets and ordering the correct fittings. In addition, it is also possible to display the planned cabinets in AutoCAD® to make further adjustments.

3D display in AutoCAD® possible

##### DYNACAT (Electronic Product Catalogue)

DYNACAT supports you during fittings selection and also provides additional, useful information regarding manufacturing and assembly.

##### DYNASHOP (Shopping Basket)

DYNASHOP makes it easy to order the fittings selected in DYNAPLAN and DYNACAT. But it also gives you access to additional useful functions.

## What are the advantages of DYNALOG?

- Supports kitchen planning and manufacturing
- Kitchen planning according to DYNAMIC SPACE criteria with the new CABMAX module
- Easy cabinet planning
- Complete data for manufacturing and ordering
- Fast and easy to learn
- No trial applications thanks to integrated collision checks
- Order errors are avoided by creating complete order lists
- Easy organisation by assigning fittings parts lists into projects
- You can integrate the part numbers and prices from your hardware distributor
- Data can be re-used in other programs
- 3D display in AutoCAD® possible

### Ordering DYNALOG

DYNALOG 2.6 is available in a full version and a limited version. You can try out all the functions of DYNALOG for 60 days for free with the limited version.

After the 60 days have expired, you will need to order the full version of DYNALOG 2.6 from your hardware distributor to continue using all the functions of DYNALOG.

Once ordered, you will always be up-to-date. Updates are available online so that your DYNALOG version will always be up-to-date. Registered users of the DYNALOG full version will be informed when updates are available and can download them free of charge, via the Internet.
