Add unexpected artistry and style to the kitchen. Start a dialogue and invoke energy into the heart of the home while infusing it with personality. Color commands attention — beautifully.

Color Warms

Rich Café Brown, Biscotti, Biscuit and Truffle are timeless hues that lend a bold look and strong statement, with the ability to accent or accentuate. Warm neutrals strike the perfect balance between daytime ease and nighttime elegance.

Color Cools

Neutral tones such as Metallic Gray, Cinder, White and Anthracite create a sophisticated look and offer a soft spoken magic that blends, elevates and complements into a world of possibilities.

Color — why it matters...

Because nothing infuses emotion or inspiration to a space more effectively than color.

Color Wows

The bigger the dream, the more color makes an impact. And whether the challenge is couture or cool, it will be 100% you. Lose yourself, or find yourself in the process. It's a visionary's source of inspiration.

Be An Informed Consumer

Why Buying from a Showroom Makes Sense!

1. The Right Product

BLANCO® products are constructed to the highest quality standards and will give you years of enjoyment. It is important that you select the right product, design and style for your home. For the best shopping experience, BLANCO strongly recommends that you purchase our products through local authorized showrooms.

2. Warranty Support

If you purchase a BLANCO product from an **UNAUTHORIZED** INTERNET RETAILER any and all claims (whether the claim is for a defect or for damages) relating to the product **will not have the benefit of being covered by BLANCO's warranty**. Instead, you will have to resolve any such claim only with the internet retailer from which you purchased the product. BLANCO cannot guarantee that the product you buy from an unauthorized internet retailer is an authentic, quality BLANCO product that is new and fit for installation and use.

3. Customer Service & Satisfaction

An experienced showroom consultant can work with you to avoid the pitfalls of poor planning, unforeseen installation issues and much more. That is real service and value all in **a person you can trust**.

BLANCO America carries a **1 YEAR LIMITED WARRANTY ON ALL CUSTOM ACCESSORIES** to be free of all manufacturing defects under normal use.

Care and Cleaning

STAINLESS STEEL KITCHEN & BAR SINKS

Your BLANCO® stainless steel sink is made of 304 series alloy stainless, featuring the highest quality 18/10 chrome-nickel formulation. This elegant, heavy-duty, 18 gauge, non-porous material is hygienic, rust-free, and extremely durable. Our satin polished finish creates an enduring, easy-to-clean luster that is impervious to water stains and calcium deposits. (Note: these instructions also apply to our 304 series, 18 gauge, 18/8 chrome-nickel MAGNUM series and our 304 series, 20 gauge, 18/8 chrome-nickel SPEX series stainless steel sinks. Note: Your bar sink may be either a polished or satin finish, depending on model purchased.

General Care & Cleaning:

After every use, rinse thoroughly, then wipe the sink dry with a clean soft cloth. Wiping is the key; this will inhibit water spotting and mineral deposits in severe hard water conditions. BLANCOCLEAN, BAR KEEPERS FRIEND, SOFT SCRUB WITH BLEACH, ZUD, FLITZ, GORDON'S MIRACLE SHINE and/or SHINEY SINKS PLUS (follow the directions on the product) are products available in hardware and grocery stores that can be used every day to protect, polish and clean your stainless steel sink.

What Not To Do:

Do not use any abrasive cleaners such as scrub pads or Steel Wool, as these products will dull and tarnish the finish. Don't let household cleaning agents, such as bleach, sit in your sink for a long period of time as this may ruin the finish of your sink.

Surface Rust & Stains:

Stainless steel does not rust. If something external has caused rust on this surface, GORDON'S MIRACLE SHINE, FLITZ, SOFT SCRUB WITH BLEACH, ZUD & BAR KEEPERS FRIEND are all effective at removing "surface" residue such as: tarnish, rust, lime deposits & hard water stains. Follow the directions on the bottle. **Do not use rubber-coated mats** as discoloration of the sink may occur after prolonged use. Similarly, any wet sponges or cleaning materials left on the sink for long periods of time could stain the sink surface.

Scratches:

Scratches are inevitable in any sink material, including stainless steel. Over time, these scratches will become uniform with the sink's grain. It is recommended to purchase a custom sink grid to protect against scratches. In regards to stainless steel, most minor scratches can be softened with a Scotch Brite (soft scour) pad, accompanied with a deep cleansing agent such as BAR KEEPERS FRIEND, BON AMI, ETC. Wet pad, apply cleansing agent, rub with the "grain" or finish of the sink (NOTE: DO NOT JUST RUB AGAINST THE GRAIN OR IN ONE AREA. THIS MAY DULL THE FINISH. YOU MUST RUB ACROSS THE ENTIRE SURFACE), then rinse thoroughly. For severe scratches, secure a pumice rubbing compound from a hardware store, and follow the directions on the package. Note: Once the sink's finish has been restored to your satisfaction, BLANCO recommends the purchase of a customized sink grid to protect the bowl's bottom.

SILGRANIT SINKS

General Care & Cleaning:

Daily cleaning may be done with any non-abrasive cleaner (i.e. Bar Keepers Friend, Soft Scrub, Soft Scrub with Bleach, or dishwasher soap). After every use, rinse and wipe the sink dry with a clean, soft cloth to eliminate any water spots or soap film build-ups.

Removing Stains And Minor Scuff Marks:

Normal Stains ~ For stains, please use a mild abrasive cleanser, along with a soft scouring pad. Stubborn Stains ~ A solution of 50% bleach, 50% water should only be used for tough, stubborn stains. Let the solution sit in the bottom of the sink for one hour; then scrub. Rinse well. Also, the use of Bar Keepers Friend or baking soda (directions included on bottle or can) will help remove stubborn stains. (NOTE: with Anthracite or Café Brown, sink must be rinsed thoroughly with hot water).

Luster:

Mineral oil applied with a damp cloth can be used to restore the luster.

Miscellaneous:

To remove Calcium Deposits (a white ring around the bottom of your sink): use LIME AWAY or CLR cleaner
To remove Adhesive Labels: use rubbing alcohol
Note: Always test any stain removers in a small, non-visible location

What Not To Use:

- 1) Do not use any abrasive cleaning agents or scrub pads, such as Steel Wool
 - 2) Straight bleach
 - 3) Commercial alkalis, such as ammonia and/or caustic solutions
 - 4) Drain blocking chemicals that involve filling the sink with water
 - 5) Do not use sink for cleaning paint or grout materials
- Note: Always test any stain removers in a small, non-visible location

Care and Cleaning

KITCHEN OR BAR FAUCET

The BLANCO® faucet that you have just purchased has been created with craftsmanship and modern technology to give you a lifetime of beauty and service. To care for your faucet, wipe with a clean, soft, damp cloth and blot dry as often as possible. Occasionally, apply a non-abrasive polish to prevent water deposits and remove build-up of household soaps, creams, and sprays to all finishes. NEVER use abrasive cleaners or pads, or chemical cleaners of any kind (including window cleaner) on any product with a protective coating or custom finish. Such cleaners will attack the protective coating and use will void the finish warranty.

FIRECLAY SINK

General Care & Cleaning:

BLANCO Fireclay sinks are designed for simple and easy care and cleaning. After every use, rinse and wipe the sink with a clean, soft cloth to eliminate any water spots or soap film build-ups. For daily cleaning use mild dish soap or detergent with warm water and a soft cloth. Rinse thoroughly after cleaning and dry with a soft dry cloth to restore original luster of material.

SINK REVEALS

CONSIDERATIONS WHEN UNDERMOUNTING A SINK

Undermounted sinks bring a touch of refinement to any kitchen. A pleasure to own, especially at clean-up time, their design allows crumbs to be easily swept into the bowl. Truly a clean design.

Three undermount reveal options are possible depending on individual preference. These options apply to both stainless steel undermounts and SILGRANIT®. Note that BLANCO templates for most undermount sinks provide a 1/4 inch reveal around the bowl (i.e. only 1/4 inch of the sink rim is revealed). Check the instructions on the template that comes with your BLANCO sink to see the reveal measurement allotted by that template. Sink templates are supplied only as a guide. The physical use of the sink will ensure a more accurate cutout.

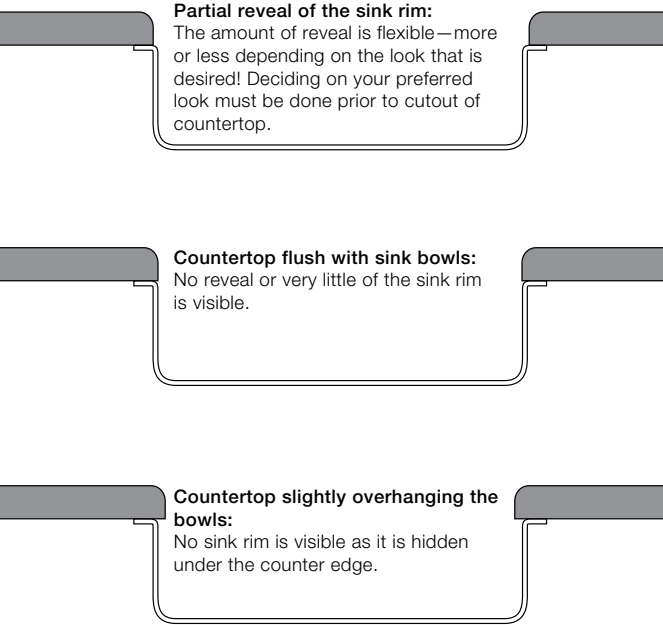

Finally, ensure that enough space is left behind the sink for any fixtures that may be required — including faucet and other accessories.

For harder to clean stains we recommend using 50/50 water and bleach solution. Rinse thoroughly after cleaning and dry with a soft dry cloth. Non-abrasive cleaners such as Bar Keeper's Friend are also effective but should be used sparingly.

What Not To Use:

- Do not use any harsh abrasives or caustic cleaners containing ammonia or alkalis to clean sink surfaces.
- Do not use materials such as scouring pads, steel wool, abrasive powder or liquid cleaners when cleaning sink surfaces.
- Do not use paint removers, oven cleaners, or aggressive chemical solutions to clean sink surfaces.
